Software Developer

Full Stack Developer with hands-on experience across 3 internships, building and shipping web applications using React, Python, Flask, Node.js, MySQL, and MongoDB. Proven ability to write clean, scalable code, integrate REST APIs, and manage databases for real-world projects. MCA student at Kristu Jyothi College with a published research paper and strong project portfolio. Ready to contribute to fast-moving development teams from day one.

WORK EXPERIENCE

Dodo Interactive 03/2026 - Present Frontend Developer • Internship Kochi

- Coordinated with the backend team to integrate API structures, ensuring accurate and error-free data rendering across all frontend components.
- Reduced page load issues by debugging and refactoring frontend code, improving overall user experience.
- Led** version control and code collaboration for a 3-member development team using Git and GitHub throughout the project lifecycle.

Fawstech Innovations 12/2025 - 03/2026 Software Developer • Internship Kochi

- Developed and deployed 2 scalable business web applications using Python and Flask, integrated with Firebase and third-party services for real-time data handling.
- Built 2–3 React Native mobile UI screens** using Python-integrated backend, improving user interaction and app usability within 3 months of deployment.
- Redesigned database schema** for a core project, noticeably improving query speed and streamlining backend integration with application modules.
- Conducted end-to-end testing and troubleshooting**, identifying and resolving several critical bugs before deployment to ensure stable application performance.

Byteminders 07/2025 - 09/2025 Full Stack Developer • Internship Mumbai

- Built a full-stack task manager** using HTML, CSS, JavaScript, and MySQL with CRUD functionality, user login, and task tracking features — developed as a hands-on MERN learning project.
- Designed and delivered** a client-ready portfolio website using MERN stack within the 3-month internship, applying full-stack development skills end-to-end.
- Managed version control using Git and GitHub, maintaining clean commit history throughout development.
- Performed manual testing and debugging to identify and resolve frontend and backend issues.

EDUCATION

Master of Computer Application 10/2024 - 04/2026 Kristu Jyothi College of Management and Technology

Bachelor of Science in Mathematics 09/2021 - 04/2024 Assumption College (Autonomous), Changanacherry

CERTIFICATIONS

Data Analyst Certification

Power BI Certification

Python Certification
Machine Learning Certification
NPTEL Certification
MERN Stack Development - Capital Infotech

PROJECTS

Tourism Management System (MERN)

Developed a full-stack tourism platform using the MERN stack (MongoDB, Express.js, React, Node.js) with features for tour package browsing, booking management, and user authentication — backed by a secure REST API and responsive UI.

TrustShield Women Safety App

Developed a women safety application with emergency alert features, real-time location sharing, and secure user access to enhance personal safety and quick response.

Smart Attendance System (Python + AI)

Built an AI-based attendance system using Python, Flask, and OpenCV for face recognition, automated attendance tracking, and efficient record management.

Hospital Management System (Flask)

Built a backend-driven hospital management system using Python, Flask, SQL, REST APIs, and PostgreSQL. Implemented authentication, patient record management, database operations, and query optimization for efficient workflow handling.

Electricity Billing & Analysis System

Developed an electricity billing and analysis system to manage customer billing, usage tracking, and consumption insights — with automated report generation and SQL-based queries for data analysis.

PUBLICATIONS

The Mindful Matrix: Exploring Social Media's Influence on Mental Wellbeing

12/2024

International Research Journal on Advanced Engineering and Management (IRJAEM)

Published a research paper titled "The Mindful Matrix: Exploring Social Media's Influence on Mental Wellbeing" in IRJAEM (Vol. 02, Issue 12, December 2024), focusing on the impact of social media on mental health and user behavior.

SKILLS

Database: Database management, Firebase, Firebase Authentication, MongoDB, MySQL, Query Optimization, SQLite

Tools: Git, GitHub, Jupyter, Power BI, VS Code

Extras: Adaptability, Analytical Thinking, Code Review, Communication Skills, Fast Learner, Performance Optimization, Problem Solving, Team Collaboration

Frontend: API Integration, CSS, HTML, JavaScript, React.js, React Native, Responsive Design

Backend: AI Features Integration, Express.js, Flask, Node.js, OpenCV, Python, REST APIs
